- 5. Make me chart of total sales according to the days of week and make this chart interchangeable according to the days itself.**

Excel Project

Kofi-Bay Analysis

Answers:

1. Total sales made was \$698,812.33 and chart was made to show sales according to each product category.
2. Chart was made to show sales according to hours. The sales are at peak during hour 7, 8 and 9. This is because of the offices starting time.
3. Slice was added to make an interactive chart for total sales according to month.
4. Top 5 products that are in sale are listed and shown in a chart.
5. Slicer was added and an interchangeable chart was made to show sales according to days of the week.

Excel Project

Kofi-Bay

Analysis

The sales of this coffee shop seem to be affected by many different factors such as time of the day, specific days and the months. The most sold-out time is 10 Am on Monday of the month June with coffee itself being the most sold-out product.
